HELP2U: ITERATION 1

Group Members:

1. Chan Zi Hao (B2400169)
2. Kaung Myat Si Thu (B2401138)
3. Tan Yen Tze (B2501146)

INTRODUCTION

- Students often struggle with coursework, technology or settling into university, and don’t know who to ask.
- Peers who have already solved these problems are a ready source of help.

AIM

- Create a central, trustworthy platform for HELP University students to request and offer peer support
- Handle the matching of students to suitable volunteers and retain all support history

OBJECTIVE

Use Case 1 (Yen Tze)

- Implement a secure authentication system that verifies student identity using two-factor authentication
- Allow students to manage their profile and become volunteers

Use Case 2 (Si Thu)

- Enable students to submit support requests
- Allow students to match with volunteers based on skills, availability and support mode

Use Case 3 (Zi Hao)

- To implement a session management module that allows student and volunteer to schedule or cancel sessions
- Allow volunteers to mark session as completed
- Provide students a channel to give their feedback on the session

MILESTONE FOR ITERATION 1

Use Case 1 (Yen Tze)

- Backend: Basic Registration & Login API
- Backend: Basic Profile CRUD API
- Frontend: Login/Register & Profile UI

Use Case 2 (Si Thu)

- Backend: Support Request CRUD API
- Frontend: Submit & View Request UI

Use Case 3 (Zi Hao)

- Backend: Session Scheduling API (Create/View)
- Frontend: Session Scheduling UI

LIVE DEMONSTRATION

THANK YOU
